Re: July 24, 2017 FOIA Request

Dear Ms. McCoy:

I am pleased to help you with your July 24, 2017 Freedom of Information Act ("FOIA"). The Village of Bensenville received your request on July 24, 2017. You requested copies of the items indicated below:

"811 Eagle Drive Environmental Records."

After a search of Village files, the following documents are enclosed to fulfill your request:

- 1) 811 Eagle Drive Environmental Concern Letter. (4 pgs.)

These are all of the documents that can be discovered responsive to your request.

Please be advised there may or may not be additional records to your request that cannot be provided by the Village of Bensenville. Please contact the Illinois Fire Marshall Officers to conduct a search of their files.

Do not hesitate to contact me if you have any questions or concerns in connection with this response.

Very truly yours,

Corey Williamsen
Freedom of Information Officer
Village of Bensenville

Fm: Concerned Environmentalist Group.---- cegpbab@yahoo.com

It has come to our attention, through research and dedication to protecting our environment; there are locations in the Bensenville and Elk Grove Industrial Park that are deemed to be possible problematic EPA CONCERN'S.

Our records indicate one location, with possibly 3 tanks containing diesel and/or regular gasoline to service a *NORTH STATE STEEL CORPORATION* and/or other Businesses from 1973 to 2007 at the 811 EAGLE DRIVE BENSENVILLE IL 60106 location.

We have encountered many business owners during their tenancy and/or ownership of particular building locations that have not followed proper procedure to: 1) Remove these faulty tanks per Illinois State and County codes. 2) Properly fill these tanks with Slurry mixture 3) Replace these tanks and 4) Properly DISCLOSING the issue or a potential problem

to a buyer there by omitting the existence of these tanks to a new owner. This may be due to the OHARE EXPANSION, when owners of these properties wanted top dollar for these buildings and chose to sell.

We fully understand that earlier records originally kept as hard copies were subject to all the perils; water, fire and misplacement and that some records were lost during a flood. Our research may lend itself to assisting in locating these tanks that may have been overlooked and may present possible contamination issues with the expansion project.

If our records are correct there is at least one tank(s) on the south west section of the parking lot, east of the loading dock that needs further review and inspection. According to neighboring business owners, the previous owner paved over where the tanks were located.

There are no records to our knowledge that the OSFM witnessed the closing of these underground tanks per --state code and product may have been left in some if not all of the tanks, once again creating an environmental and safety issue.

Thank you very much for looking into this matter, we truly appreciate it.
