BACKGROUND:

In recent years, as the Village has adopted a complete street policy, Village staff has focused on improving the infrastructure as a whole for any street project. This includes, but is not limited to pavement, C&G, sidewalk, underground utilities, aesthetics, bicycle accommodations, etc. Based on the age of the watermain (1960s) and the maintenance history, Village staff has identified portions of Medinah Street, Brookwood Street, and Glendale Street as candidates for watermain replacement. The project limits are along these 3 streets are from Marshall Road on the west and Eastview Avenue on the East. The watermain in the proposed project area is original to its 1960s installation and is nearing the end of its useful life cycle. Furthermore, the latest Pavement Condition Index study indicates the average PCI of these roadways averages between forty (40) to fifty (50). Tackling the watermain replacement on these roadways in conjunction with the pavement rehabilitation assures our new roadway will completely serve the residents for years to come.

COMMITTEE ACTION:

Committee of the Whole

DATE:

February 15, 2022

BACKGROUND:

The Eastern Avenue Reconstruction project is intended to continue to revitalize our Northern Business District, building on the previous Northern Business District projects that started nearly ten years ago. Tax Increment Financing District 12 (TIF 12) was previously established to generate funds to perform various levels of infrastructure improvements within its respective boundaries.

The latest Pavement Condition Index (PCI) study indicates the PCI of this existing hot-mix asphalt roadway averages less than twenty-five (25). The scope of this project includes the removal of existing pavement, base course and sub-base to the proposed sub-grade elevation. A new full depth concrete cross section will be constructed, matching the concrete pavement cross section that has been successful in other areas of the Business District. Other work includes curb & gutter removal and replacement, sidewalk removal and replacement, driveway apron construction, storm sewer construction, water main replacement, sanitary sewer repairs, and sod restoration.
